INSERTS
FOR
SUMMARIES
FLUID MILK MARKETING ORDERS
Revised to October 1, 1952
and
Federal Register Citations
for the Milk Price Orders

The attached are inserts to be substituted for the corresponding pages in the Summaries of Fluid Milk Marketing Orders, April 1, 1948, and Federal Register Citations for the milk price orders. These inserts revise the Federal orders as effective on October 1, 1952. The last insert was issued on September 1, 1952.

Agriculture - Washington

Class Prices (3.5 per cent butterfat):

"Basic formula" price - A "basic formula" price is used for Class I and Class II. It is the highest of the following, computed for the preceding month:

- (1) Prices paid for 3.5 per cent milk at 18 Midwest condenseries (see Chicago order for list),
- (2) Price per pound of 93-score butter (if 93-score butter is not quoted for any day, use highest of prices for 92-score) times 4.24, plus 8.2 times price per pound of nonfat dry milk solids (spray process, human consumption, f.o.b. manufacturing plants in the Chicago area) minus 75.2 cents.

Class I and Class II Prices - "Basic formula" price plus fixed differentials:

Month	Fixed Differential	
	Class I	Class II
	(cents per hundredweight)	
May-June	56	40
July-Nov.	106	70
Dec.-Apr.	76	50

And plus or minus a "supply-demand" adjustment based on sales and receipts in the Chicago market. (See Chicago summary for details).

Class III Price - The higher of:

- (1) Average price paid for the current month, for 3.5 percent milk at the following plants:

Kraft Foods, Inc.,	Hartford, Wisconsin
Carnation Company,	Oconomowoc, Wisconsin
White House Milk Co.,	West Bend, Wisconsin

If prices are not reported for one or more of these plants, prices at the following plants are included:

Armour & Co.,	Stoughton, Wisconsin
United Milk Products Co.,	Johnson Creek, Wisconsin

(2) The Class IV price.

Class IV Price - The second alternative method of computing the "basic formula" price (butter-nonfat solids).

- (2) Price per pound of 92-score butter at Chicago less 3 cents times 1.2, times 4.0, plus the price per pound of nonfat dry milk solids (carlots, spray and roller process, for human consumption, f.o.b. manufacturing plants in the Chicago area) less 5.5 cents, times 8.5, times 0.96.
- (3) Average prices paid for ungraded 4.0 per cent milk at the following plants:

Carnation Company,
The Borden Company,
Lamar Creamery,

Sulphur Springs, Texas
Mount Pleasant, Texas
Paris, Texas

Class I - For the months of April, May, and June, add to the basic formula price \$2.00 per hundredweight and for all other months \$2.20 per hundredweight (for the months of October 1952 through February 1953 add \$2.66 and for March 1953 add \$2.43), subject to a supply-demand adjustment, not to exceed 50 cents, computed from a net utilization percentage, i. e., the percentage which producer receipts are of Class I milk during the second and third preceding months. For each percentage point that the net utilization percentage is less than the minimum listed below the price shall be increased 2.5 cents and for each percentage point that the net utilization percentage is above the maximum listed below the price shall be decreased 2.5 cents.

2-month period	Percentages		Month in which adjustment applies
	Minimum	Maximum	
January and February	108	118	April
February and March	112	122	May
March and April	115	125	June
April and May	120	130	July
May and June	125	135	August
June and July	120	130	September
July and August	115	125	October
August and September	107	117	November
September and October	100	110	December
October and November	100	110	January
November and December	102	112	February
December and January	105	115	March

- (2) Except for the foregoing supply-demand adjustment, the Class I price for October, November, and December shall not be less than that for the preceding month and during April, May, and June shall not be more than that for the preceding month.
